Our Values Expanded On

We Believe

In the use of the Girl Guide method so youth members can take the lead in their learning and have the chance to grow the 21st century skills (communication, collaboration, creativity, character, citizenship and commitment) that our method develops best

That volunteering plays a significant role and makes a positive contribution to improving the people's lives, and to strengthening communities and civil society.

That our members can be a powerful force in making the world a better place.

That each member is on a self-paced journey of learning and that each member takes responsibility for their own development.

That every and any girl and young woman should feel that Girl Guiding is a place where she can be herself, explore her identity and her beliefs, and find opportunities to thrive

That learning is a two-way process and that people of all ages have something to learn and something to teach.

Therefore We Will

Continue to support the Girl Guide method by training our Leaders and providing resources and opportunities to our members

Provide resources, opportunities, and training to strengthen our members' motivation, commitment, and sense of identity.

Empower them to advocate on issues important to them.

Develop core competencies in leadership, decision-making and other life skills, and enable them to gain intercultural and inter-generational understanding.

Prioritise inclusion which means putting time and resources into understanding and responding to inequitable access to Girl Guiding in our different societies.

Support leadership development to ensure the future of the organisation
